

## The Christmas Giving Project

Hammonton Student Council is very active in many different community activities, however the most meaningful activity is the Christmas Giving Project. The project connects the Hammonton Community to the Camden Community in a very holiday spirited way. This project involves around 150 Hammonton Students and about 100 Camden Elementary Students. In this project generous Hammonton students donate fantastic Christmas gifts to the youths of Camden. In months of preparation, as student council representatives we plan the organization of the gifts, students, and classrooms for the day of the trip. The student council gives 100 Camden students over 1,000 dollars worth of gifts and makes their Christmas the best they ever had. This not only connects our community, but it connects multiple communities. It allows the Hammonton Students to appreciate all of the things they have, while showing them that each individual has the power to make a change. This project inspires students to make a change and help the world in anyway they can. This project is our favorite because we become great influences on young minds, and push Hammonton students to make a change in the world around them. Overall, this amazing project deserves this award because the hard-work, dedication, and commitment allows students to grow socially and humbly.
